NATIONAL SUMMARY

Driving Prices Up

- Mice concerns are already being experienced in the Darling Downs of QLD as growers move quickly to try and bring numbers under control. As farmers continue to seek out good quality hay unaffected by mice. NSW growers reduced hay plantings this year following significant issues with mice at the start of 2021 and preferring to go through to grain as the commodity can be removed off farm quickly.
- Attractive grain prices continue to play a big part in grower's decisions this year to adapt and take crops through for grain harvest. With reports many still with hay stores that haven't been traded during the winter.
- Cost of production with many products not available or significantly increased in price, in particular fertiliser due to COVID. Labour shortages continue to impact growers as they race to secure staff for the upcoming harvest with many having to pay increased wages to remain competitive.
- Despite a strong cattle market feedlots are increasing numbers to meet export markets and will need the fodder to support this demand.

Driving Prices Down

- Trade is minimal at present with many now waiting to see what will be available from the new season, with pricing expected not to significantly increase in the short term.
- Good spring conditions will see many farmers producing and conserving as much silage as they can, particularly along the NSW Coast and Victoria.
- All time high cattle prices continue to impact the trade of hay as many farmers are selling stock at weaning and not requiring the extra feed to carry them through.
- Significant amount of weather damaged hay is still on the market now pushing the lower end of pricing further down. Growers are now finding it difficult to move this and will have to carry it over until a shift in demand.

Local News

- Warm and windy conditions across the southern parts of the country for the first week of spring. Many growers looking to the forecasted wet conditions now for the weekend to finish off winter crops.
- Boarder closures and permit requirements continue to be a concern for contractors as we approach the new silage and hay season.
- Many growers have started or are on the verge of cutting for silage with big crops being reported.
- In general crops are doing well across all states with the exception to parts of Central Queensland and Western Victoria who have missed timely rain during the growing season.
- In the north demand in the Atherton Tablelands remains steady with a small amount moving locally. Following the ongoing rainfall in Northern QLD many parts including the Tablelands continue to have an influx of fresh grass. The Darling Downs region reporting one of the best starts to a season following good rainfall for the first half of the year. Barley crops have started to be cut in the area for hay.

- Southern Australia is again on track for a good season with timely rain, most regions are reporting good growth. Northern Victoria have started to cut silage, with many growers looking to turn these paddocks around for hay with good conditions. Several key factors still needed to take place and a relatively dry spring to improve on last year's season.
- Western Australia has recorded one of its best season breaks. Rain has continued to fall during August but not the record falls recorded in July. High yields expected through the region as the season continues to progress well. Prices remain strong for all fodder types in WA.
- Buyers are encouraged to feed test and view fodder before purchasing to be sure of the quality of the feed.

Regional Commentary

Atherton Tablelands

- Atherton has received some warm days this week as well some light rain.
- Conditions have been up and down for growers wanting to bale rhodes grass with rain being predicted but not eventuating. Grasses are young and can handle being left for dryer conditions at this stage. Some farmers looking for silage opportunities now going into spring.
- Plenty of green feed in the region for grazing stock following winter rain across most of the Atherton area.
- Trade continues to be well down as many farmers have been able to produce a product further west which is more economical than freighting from the Tablelands.
- No changes to prices this week.
- Pasture (Rhodes Grass) hay: +/-0 (\$300 to \$330).
- Note: Hay in the Atherton Tablelands is traditionally priced at \$/bale, so it is important to check bale weights for conversion. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

Darling Downs

- Light rainfall recorded this week across the Darling Downs.
- Majority of the Darling Downs is on track for a good season, St George has missed out on significant rain over the last four weeks. Some growers have irrigated new season crops, more rain would be ideal now.
- Earlier barley crops are now being cut for hay, reports that these crops are producing good hay.
- Many crops are later this year with some only being in the ground now for six weeks following late cotton crops. Reports of mice climbing new season crops and chewing heads as soon as they appear. Growers are having to air bait to control mice numbers.
- Majority of new season fodder is going into storage for personal use as demand in the area continues to be well down.
- No change to pricing this week.
- Cereal hay: +/-0 (\$260 to \$280/t). Prices remain steady this week.
- Lucerne hay: +/-0 (\$390 to \$430/t). Prices remain steady this week.
- Straw: +/-0 (\$60 to \$70/t). Prices remain steady this week.
- Pasture hay: +/-0 (\$200 to \$240/t) Prices remain steady this week.

Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

North Coast NSW

- Conditions have become increasingly dry on the North Coast with no rain to report in the last seven days. Rain now would still be ideal, similar conditions being experienced to 2020.
- Growers have started to cut silage. Crops have been slower with dry conditions and warm days. Cooler change now will help to boost cereal crops, along with rain.
- Reports not as much silage will be made this season with demand down and many still carrying over from last season.
- Trade continues to be steady with local coastal growers selling to smaller farming operations and equine clients over the last six weeks.
- Cereal hay, straw, and lucerne prices quoted are for supplies to be carted into the region.
- No changes to pricing this week.
- Cereal hay: +/-0 (\$250 to \$300/t). Prices remain steady this week.
- Lucerne hay: +/-0 (\$380 to \$430/t). Prices remain steady this week.
- Straw: +/-0 (\$100 to \$150/t). Prices remain steady this week.
- Pasture hay: +/-0 (\$200 to \$230/t). Prices remain steady this week.
- Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

Central West NSW

- A dry week for the Central West this week.
- Crops are on track in the region, small patches of paddocks will lower yield due to waterlogging but damage is minimal and in general crops have recovered well.
- No increase in mice at this stage in region but growers and farmers continue to be vigilant. Hay production will be well down with many growers preferring to go through to grain due to current attractive prices and minimal ongoing trade of fodder.
- Trade is minimal in the region with reports of Queensland feedlots seeking straw and good quality oaten hay for entry cattle from New South Wales growers. Lucerne moving to the New England area for farmers weaning cattle.
- <https://www.nsw.gov.au/initiative/mouse-control-support-program>
- <https://www.nsw.gov.au/media-releases/50-million-support-package-to-help-regional-communities-combat-mouse-plague>
- No changes to pricing this week.
- Cereal hay: +/-0 (\$180 to \$210/t). Prices remain steady this week.
- Lucerne hay: +/- (\$310 to \$360/t). Prices remain steady this week.
- Straw: +/-0 (\$60 to \$80/t). Prices remain steady this week.
- Pasture hay: +/-0 (\$160 to \$200/t). Prices remain steady this week.
- Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of

quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

Bega Valley

- Follow up rain for Bega this week with 12 – 16mm recorded for the region.
- Growers waiting for more growth before cutting for silage. Small amounts of rain would still be ideal to get maximum growth from grass in the region.
- Winter was not a difficult time in the region for farmers with many not having to feed out until June. Significant conserved fodder from last spring has continued to be utilised to carry stock through.
- Trade continues to be low with reduced amounts of cereal hay coming onto the coast for dairy farmers. Small squares of lucerne also trading mainly to equine customers.
- No change to prices this week.
- Cereal hay: +/-0 (\$290 to \$320/t). Prices remain steady this week.
- Lucerne hay: +/-0 (\$480 to \$520/t). Prices remain steady this week.
- Straw: +/-0 (\$200 to \$230/t). Prices remain steady this week.
- Pasture hay: +/-0 (\$350 to \$400/t). Prices remain steady this week.
- Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

Goulburn/Murray Valley

- Warm and windy conditions for the region this week with up to 20mm of rain forecast in the coming days.
- A significant amount of silage has been cut in the last seven days with warm conditions, growers now baling before the forecast rain.
- Very minimal rain needed now, paddocks are still wet. Growers wanting to make hay will need big windows this year for drying time with heavy crops being reported.
- Small amounts of good quality lucerne continue to move into New South Wales primarily the North Coast.
- Changes to lucerne hay pricing this week.
- Cereal hay: +/-0 (\$180 to \$200/t). Prices remain steady this week.
- Lucerne hay: -\$50 (\$450 to \$500/t). Prices have eased this week.
- Straw: +/-0 (\$70 to \$100/t). Prices remain steady this week.
- Pasture hay: +/-0 (\$230 to \$280/t). Prices remain steady this week.

Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

Gippsland

- No rain to report this week for Gippsland.
- To dry out the region needs to keep receiving small amounts of rain. Growers and farmers set to make a significant amount of silage again this season.
- Reports crops are up to four weeks behind on where they would normally be for silage season.
- Cereal and vetch hay continues to be traded into Gippsland from the Mallee for dairy farmers calving in cattle. Farmers only taking what they need to get through now.
- No changes to prices this week. Good quality vetch is being delivered for \$300/t into Gippsland from the Mallee.
- Cereal hay: +/-0 (\$210 to \$250/t). Prices remain steady this week.
- Lucerne hay: +/-0 (\$550 to \$650/t). Prices remain steady this week.
- Straw: +/-0 (\$70 to \$85/t). Prices remain steady this week.
- Pasture hay: +/- (\$90 to \$110/t). Prices remain steady this week.
- Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

Southwest Victoria

- This week in the south 8mm of rain was recorded, Warrnambool recording close to 80mm for the month of August.
- Good rainfall is still needed now in the Wimmera and Mallee for cereal crops to finish well. Reports that growers are turning sheep onto vetch crops due to the lack of rain.
- Conditions still damp in the south with several overcast days. Pasture is slow growing, but growers are reporting a good season ahead.
- Farmers are still buying in feed in the Warrnambool region and other southern parts until pastures are more viable. Vetch coming from the Wimmera and cereal hay is currently freighting into the area from Ararat.
- No changes to prices this week. Good quality vetch is being delivered for \$280/t.
- Cereal hay: +/-0 (\$170 to \$220/t). Prices remain steady this week.
- Lucerne hay: +/-0 (\$350 to \$400/t). Prices remain steady this week.
- Straw: +/-0 (\$60 to \$80/t). Prices remain steady this week.
- Pasture hay: +/-0 (\$150 to \$180/t). Prices remain steady this week.
- Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

Southeast South Australia

- No significant rain for the Southeast this week.
- Conditions have been wet for the region, but crops are looking good, and the region is on track for a good season. Reports that silage and hay production will be well down on previous years.
- Paddock feed slowly returning, farmers with heavier stock numbers still needing to supplement feed.
- Steady trade for growers to beef and sheep farmers. Also, opportunist buyers that have storage are taking advantage of any good quality fodder on the market. Some inquiry for straw from farmers but a majority at this stage are not wanting to buy significant amounts of fodder leading into the spring.
- No change to pricing this week.
- Cereal hay: +/-0 (\$200 to \$230/t). Prices remain steady this week.
- Lucerne hay: +/-0 (\$330 to \$350/t). Prices remain steady this week.
- Straw: +/-0 (\$100 to \$120/t). Prices remain steady this week.
- Pasture hay: +/-0 (\$180 to \$200/t). Prices remain steady this week.
- Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

Central South Australia

- Warm and windy conditions with a top of 32 degrees this week. Rain is forecast with reports 10 – 20mm could fall across the region.
- Crops are soft with some signs of stress with growers noticing browning. Rain would be ideal now for these winter crops.
- Local trade has slowed as paddock feed continues to improve. Many now waiting to see what the new season hay season will bring before committing to any more fodder purchases.
- Exporters will only take a reduced amount of new season cereal hay and it will need to be a premium product.
- Changes to cereal hay pricing this week.
- Cereal hay: -\$20 (\$170 to \$200/t). Prices have eased this week.
- Lucerne hay: +/-0 (\$400 to \$450/t). Prices remain steady this week.
- Straw: +/- (\$90 to \$140/t). Prices remain steady this week.
- Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

Southwest Western Australia

- Light rain for the west this week with 11mm being recorded in the York area. Concerns over frosts in the coming days particularly for crops in lower lying country.
- Reports of water still laying in lower parts of paddocks. Waterlogging has been a significant widespread problem this season. Conditions are starting to improve, warmer weather needed now following ongoing rain and generally cold weather.
- Minimal domestic trade at present with reports still on the demand for straw. Only a small amount of straw stored undercover this season, as the chicken industry continues to seek out a good quality product.
- The season is still on track to be a success in the west with big yields already being forecast for grain and hay growers. Mixed reports on how much hay will actually be produced this season.
- No changes to prices this week.
- Cereal hay: +/-0 (\$260 to \$310/t). Prices remain steady this week.
- Lucerne hay: +/-0 (\$450 to \$490). Prices remain steady this week.
- Straw: +/-0 (\$130 to 180/t). Prices remain steady this week.
- Pasture hay: +/-0 (\$180 to \$200/t). Prices remain steady this week.
- Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.

Northwest Tasmania

- Parts of the Northwest recorded 110mm of rain during August. The first week of September has also brought light rain with reports of 5mm.
- Crops have been waterlogged with oat crops showing signs of stress. Conditions have started to improve with warmer days in the more eastern areas where rain has been minimal again this week. Growers getting onto paddocks when they can to spray and fertilise, lower country still not able to be accessed with ongoing rainfall.
- Reports growers are preparing for a big hay season. Ongoing wet weather could push the season out. The latest season start for the Northwest have been the second week of November.
- Demand continues to be steady as farmers continue to feed out until paddocks can carry stock again. Majority of cereal hay produced last spring has all but been traded now.
- No changes to pricing this week.
- Cereal hay: +/-0 (\$220 to \$280/t) Prices remain steady this week.
- Lucerne hay: +/-0 (\$300 to \$350/t) Prices remain steady this week.
- Straw: +/-0 (\$150 to \$200/t) Prices remain steady this week.
- Pasture hay: +/-0 (\$200 to \$240/t) Prices remain steady this week.
- Please note unless stated otherwise, prices are per tonne, sourced and delivered locally. The price range indicated is for feeds of varying quality with the price range generally indicative of quality of feed. We recommend feed testing and viewing of fodder before purchase to be sure of the quality of feed.
